Bengalack Metal

Add some life to metal

Gloss 90 | Matt 06 | Metal Primer | Aluminium Paint

Exterior

Bengalack – beauty and ultimate protection in one!

Bengalack has protected fences, gates, flagpoles, tools, bicycles and other metal applications for generations. Weather, corrosion, rust, wear and tear – Bengalack takes it all in its stride.

But it's not only the protective credentials that will catch your eye: Bengalack is available in a wide palette of colours to suit every application, delivering unprecedented colour choice and a bright, shiny finish that will last and last.

For brilliant results and long-lasting durability, when used in combination with Bengalack Metal Primer, Bengalack is the classic choice.

Welcome to the colourful world of Bengalack

It used to be the case with metal coatings that the choice of colours available was limited. That's not the case with Bengalack Gloss 90 with its impressive palette which includes a series of specially selected colours specifically created for businesses in the agriculture, oil industry and public administration sectors.

For best results in colour rendition and quality ensure that all coatings are mixed using Jotun's Multicolour tinting system. The colours shown in this colour card may vary from the actual colours available due to a number of reasons including the limitations of the printing process as well as different lighting conditions. Lustre and foundation can also have an impact on the colour's aspect.

Bengalack Metal Primer (Arcanol) possesses rust-inhibiting properties and excellent weather resistance. This primer ensures good protection against rust and corrosion to materials such as steel, iron, aluminium, and galvanised surfaces. It is recommended as a primer for Bengalack Gloss 90, but can also be used alone as a topcoat (2 or 3 applications for best results).
