## Penguard HSP ZP

## Product description

This is a two component amine cured epoxy coating. It is a fast drying, zinc phosphate pigmented, high solids, high build product. Specially designed for new construction where short dry to handle and over coating times are required. To be used as primer in atmospheric environments. Suitable for properly prepared carbon steel substrates.

## Typical use

Suitable for structural steel and piping to be exposed to corrosive environments. Recommended for power plants, airports, buildings, refineries and mining equipment. Designed as a primer for Jotun's SteelMaster intumescent thin film passive fire protection coatings.
