Road Marking Paint

Product description

Type
This is a quick drying, solvent based paint. Based on solvent based acrylic resin.

Features and benefits
Can be used for marking roads and kerbs. Easy to apply. It has UV resistant colours.

Recommended use
Ideal for use on asphalt and concrete roads, primarily for kerbstones, speed humps or other areas with light traffic.

Substrate
Roads and kerbs

Cleaning of painting tools

Jotun Thinner No. 7
**Film thickness per coat**

**Typical recommended range**

- **Dry film thickness**: 40 - 80 µm
- **Wet film thickness**: 110 - 210 µm

Film thickness will vary and is calculated as average.

**Theoretical spreading rate**: 9.25 - 4.5 m²/l

Spreading rate depends on film thickness applied, type of texture, surface porosity, imperfections, temperature, wastage during painting etc.

Maximum spread rate per coat is obtained at minimum dry film thickness and vice versa.

**Thinner**

Jotun Thinner No. 7

**Dilution**

Maximum 10 %

**Conditions during application**

The temperature of the substrate should be minimum 10 °C and at least 3 °C above the dew point of the air, measured in the vicinity of the substrate. Good ventilation is usually required in confined areas to ensure proper drying. The moisture content in the substrate should not exceed 4 % (by weight). The coating should not be exposed to oil, chemicals or mechanical stress until fully cured.

**Drying times**

Drying times are generally related to air circulation, temperature, film thickness and number of coats, and will be affected correspondingly.

1. Recommended data given is, for recoating with the same generic type of paint.

2. In case of multi-coat application, drying times will be influenced by the number and sequence and by the total thickness of previous coats applied.

3. The surface should be dry and free from any contamination prior to application of the subsequent coat.

The drying time is measured by stated values:

<table>
<thead>
<tr>
<th>Relative Humidity (RH) 50 %</th>
<th>Substrate temperature</th>
<th>10 °C</th>
<th>23 °C</th>
<th>40 °C</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Surface (touch) dry</strong></td>
<td></td>
<td>20 min</td>
<td>10 min</td>
<td>7 min</td>
</tr>
<tr>
<td><strong>Hard dry</strong></td>
<td></td>
<td>60 min</td>
<td>30 min</td>
<td>15 min</td>
</tr>
<tr>
<td><strong>Dry to over coat, minimum</strong></td>
<td></td>
<td>120 min</td>
<td>60 min</td>
<td>30 min</td>
</tr>
</tbody>
</table>

**Directions for use**

**Surface preparation**

The substrate must be sound, clean, dry and free from dust, oil, grease, laitance etc. All traces of form release agents/curing agents must be removed. A light sanding with suitable abrasive material is recommended before application. Any resulting dust/loose particles must be removed.

**Recommended paint system**

**Topcoat**

Road Marking Paint : 2 Coat
Remarks
Other systems may be specified, depending on area of use.
Contents of packaging with different batch numbers must be mixed together before use.
Please refer to the Decorative Sales Department for technical advice.

For reflective properties sprinkle Glass beads over wet paint.

This product is available in: United Arab Emirates, Bahrain, Kuwait, Qatar, Saudi, Oman, Egypt and Libya

Storage
The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

Health and safety
Please observe the environmental and precautionary notices displayed on the container.

A Material Safety Data Sheet for the product has been issued. Detailed information regarding health and safety risks and precautions for the use of this product is specified in the product’s Safety Data Sheet. First-aid measures, refer to section 4. Handling and storage, refer to section 7. Transport information, refer to section 14. Regulatory information, refer to section 15.
