Jotashield (New)

Product description

Type
A premium 100% acrylic emulsion exterior paint with AntiFade Colours that fights colour fading caused by the weather elements and delivers outstanding durability with the widest selection of colours.

Features and benefits
2xUV Protected colours - Colours last two times longer than other exterior paints.
Dirt Resistance - Paint film resist dirt pick up from the environment and is easily washed off by the rain.
Reduces Temperature - Paint reflects sunlight therefore reduce the surface temperature and cools your homes or buildings.
Anti Algae & Anti Fungal - Long lasting protection against fungus and algae in tropical climates.
Water Resistant - Resist water ensuring less stain marks.
Formulated without Harmful Chemicals - Free from harmful chemicals such as APEO, formaldehyde, heavy metals and has low volatile organic compound (VOC).

Recommended use
For exterior application, suitable for new buildings or repainting.

Substrate
On concrete, masonry, plaster and brickwork.

Product data

| Packaging size | Packing may vary from country to country according to local requirements. |
| Colours | As per the colour card and available in Jotun Multicolor tinting system (Exterior range). |
| Solids | 39 ± 2 volume% |

Application data

Remarks
Handle with care. Stir well before use.

Application methods
By brush, roller, airless spray or conventional spray.

Guiding data for airless spray

| Nozzle tip | 0.021” - 0.027” |
| Spray angle degrees | 65° - 80° |
| Pressure at nozzle | 140 - 190 kg/cm² (2100 psi) |
Conditions during application
The temperature of the substrate should be minimum 10 °C and at least 3 °C above the dew point of the air, measured in the vicinity of the substrate. Good ventilation is usually required in confined areas to ensure proper drying.

Recommended film thickness per coat
Dry film thickness : 30 - 40 microns (μm)
Wet film thickness : 77 - 103 microns (μm)

Film thickness will vary and is calculated as average.

Spreading rate per coat
Theoretical Spreading rate per coat (m²/l) : 9.8 - 13

Spreading rate depends on film thickness applied, type of texture, surface porosity, imperfections, temperature, wastage during painting etc.

Thinner
Water

Dilution
The paint is ready to use after proper stirring. If thinning is required, water may be added up to a maximum of 5%.

Drying times
Drying times are generally related to air circulation, temperature, film thickness and number of coats, and will be affected correspondingly. The figures given in the table are typical with:

Good ventilation (Outdoor exposure or free circulation of air)
Typical film thickness
One coat on top of inert substrate

The given data must be considered as guidelines only. The actual drying time and time before recoating may be shorter or longer, depending on the ambient temperature, film thickness, ventilation, humidity, underlying paint system, requirement for early handling and mechanical strength etc.
1. Recommended data given is, for recoating with the same generic type of paint.
2. In case of multi-coat application, drying times will be influenced by the number and sequence and by the total thickness of previous coats applied.
3. The surface should be dry and free from any contamination prior to application of the subsequent coat.

Relative Humidity (RH) 50 %

Directions for use

Surface preparation
The substrate must be sound, clean, dry and free from dust, oil, grease, laitance etc. All traces of form release agents/curing agents must be removed. A light sanding with suitable abrasive material is recommended before application. Any resulting dust/loose particles must be removed.

Recommended paint system

Primer
Cito Primer 09 or Jotashield Primer or Jotun Ultra Primer : 1 coat
Topcoat
Jotashield (New) : 2 coats

Storage
The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

Certificates
Complies to Singapore Green Label, Malaysia SIRIM Eco-Label.

Tests
SS500:2002 requirements for Dirt Collection Index.
Test on Heat Reflective Paint and Impact on Building Energy Consumption by Building System & Diagnostics (BSD), Singapore.

Health and safety
Please observe the environmental and precautionary notices displayed on the container.
A Material Safety Data Sheet for the product has been issued.
Detailed information regarding health and safety risks and precautions for the use of this product is specified in the product’s Safety Data Sheet.
First-aid measures, refer to section 4.
Handling and storage, refer to section 7.
Transport information, refer to section 14.
Regulatory information, refer to section 15.
