SteelMaster 1200WF

Product description

This is a one component waterborne acrylic thin film intumescent coating. Independently approved for fire protection of structural steel exposed to cellulosic fire. Can be used as mid coat or finish coat in atmospheric environments. Suitable on approved primers on carbon steel substrates.

Typical use

Specially designed as a reactive fire protection system for steel constructions. Designed to protect for up to 180 minutes on a wide range of I section beams, columns and hollows. Fire tested and approved to BS 476 part 20/21. Suitable for structural steel exposed to internal environments. For a detailed coating specification please contact your local Jotun representative.

Approvals and certificates

This product contributes to the Green Buildings Standard credits. Please see section Green Building Standards.

BS 476 part 20/21
ASTM E84
EN 13831-8
CE marked product with European Technical Assessment ETA-18/0890
Reaction to Fire: Class B-s1, d0 (EN 13501-1)
Durability and Serviceability: Z2, Z1, Y (EAD 350402-00-1106)

Additional certificates and approvals may be available on request.

</table>

All steel sections must be coated with correct film thickness to achieve the required fire rating. Please refer to the current loading tables. For further advice please contact your local Jotun office.

Note: The film thickness is only achievable by airless spray application in one coat.

Surface preparation

To secure lasting adhesion to the subsequent product all surfaces shall be clean, dry and free from any contamination.

Refer to the Application Guide (AG) for additional information.

Application

Application methods

The product can be applied by

Spray: Use airless spray.

Brush: Recommended for stripe coating and small areas, care must be taken to achieve the specified dry film thickness.

Refer to the Application Guide (AG) for additional information.

For maximum overcoating intervals, refer to the Application Guide (AG) for this product.

All drying times have been measured at a wet film thickness of 1000 μm under controlled temperature and relative humidity below 80 %.

Topcoating: The minimum overcoating interval of this product with approved topcoats is 48 hours. Prior to application of topcoat, the applicator must ensure that the specified dry film thickness has been achieved and the system is dried to handle.

Surface (touch) dry: The state of drying when slight pressure with a finger does not leave an imprint or reveal tackiness.

Dry to handle: Minimum time before the coated objects can be handled without physical damage.

Dry to over coat, minimum: The recommended shortest time before the next coat can be applied.

---

**Product compatibility**

Depending on the actual exposure of the coating system, various primers and topcoats can be used in combination with this product. Some examples are shown below. Contact Jotun for specific system recommendation.

- **Previous coat:** alkyd, epoxy, epoxy zinc phosphate, zinc epoxy (with epoxy tie coat)
- **Subsequent coat:** approved list of topcoats

To ensure fire performance, primers and topcoats must be compatible with SteelMaster 1200WF. Contact your local Jotun office for a list of approved Jotun primers and topcoats.

**Date of issue:** 11 March 2019

This Technical Data Sheet supersedes those previously issued.

The Technical Data Sheet (TDS) is recommended to be read in conjunction with the Safety Data Sheet (SDS) and the Application Guide (AG) for this product. For your nearest local Jotun office, please visit our website at www.jotun.com
SteelMaster 1200WF

The volume stated is for factory made colours. Note that local variants in pack size and filled volumes can vary due to local regulations.

### Storage

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

When storing and transporting, the temperature must be between 5 °C and 25 °C. Outside of this, it is advisable to use climatic control. Protect from freezing at all times during storage and transport.

#### Shelf life at 23 °C

| SteelMaster 1200WF | 6 month(s) |

In some markets commercial shelf life can be dictated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection.

### Green Building Standards

This product contributes to Green Building Standard credits by meeting the following specific requirements:

**LEED®v4 (2013)**

EQ credit: Low emitting materials
- VOC content for Fire Resitive Coatings (350 g/l) (CARB(CSM)2007) and emission 0.5 - 5.0 mg/m³ (CDPH method 1.1)
- Material Ingredients, Option 2: Material Ingredient Optimization, International Alternative Compliance Path - REACH optimization: Fully inventoried chemical ingredients to 100 ppm and not containing substances on the REACH Authorization list – Annex XIV, the Restriction list – Annex XVII and the SVHC candidate list.
- Environmental Product Declarations. Product-specific Type III EPD (ISO 14025;21930, EN 15804).

**LEED® (2009)**
- IEQ Credit 4.2: The VOC requirements of Green Seal Standard GC-03, 1997.

**BREEAM® International (2016)**
- Mat 01: Product-specific Type III EPD (ISO 14025;21930, EN 15804).

**BREEAM® International (2013)**
- Hea 02: VOC content for One-pack performance coating WB (140 g/l) (EU Directive 2004/42/CE)

**BREEAM® NOR (2016)**
- Mat 01: The product Safety Data Sheet confirms that the product does not contain any substances on the Norwegian A20 list.

**BREEAM® NOR (2012)**
- Mat 1.5: This product Safety Data Sheet confirms that the product does not contain any substances on the Norwegian A20 list.

This product is tested by RISE Research Institutes of Sweden/SP Technical Research Institute of Sweden or Eurofins in accordance with California Department of Public Health (CDPH) Standard Method v1.1-2010.

The EPDs are available at www.epd-norge.no
**Caution**

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Jotun's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Jotun representative for approval before commencing the work.

**Health and safety**

Please observe the precautionary notices displayed on the container. Use under well ventilated conditions. Do not inhale spray mist. Avoid skin contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water. Eyes should be well flushed with water and medical attention sought immediately.

**Colour variation**

When applicable, products primarily meant for use as primers or antifoulings may have slight colour variations from batch to batch. Such products may fade and chalk when exposed to sunlight and weathering.

**Disclaimer**
