Jotashield Waterbased Penetrating Primer

Product description

Type
This product is a superior quality alkali resistant water based primer. Based on acrylic copolymer emulsion.

Features and benefits
Offers excellent alkali resistance, superior penetration and adhesion properties, which makes it suitable for chalky surfaces. This product is GS11 compliant.

Recommended use
Ideal for priming exterior surfaces.

Substrate
Cement plaster, concrete, block work, rendered surfaces, gypsum board etc.

Product data

Packaging size
4 L and 18L
Turkey
: 2.5L and 15 L

Colours
White

Solids by volume
47.8 ± 2 volume% Theoretical

Specific gravity
1.11 Theoretical

VOC
0 g/l ISO 11890 EU

Application data

The product can be applied by

Roller : Recommended.

Brush : Recommended to paint corners and edges.

Spray : Use airless spray or conventional spray.

Guiding data for airless spray

Nozzle tip
0.38-0.53 mm (0.015-0.021")

Spray angle degrees
65–80°

Pressure at nozzle
15 MPa (150 kg/cm²)

Cleaning of painting tools

Water
Film thickness per coat

Typical recommended range

Dry film thickness  25 - 35 µm
Wet film thickness  52.3 - 73.4 µm

Film thickness will vary and is calculated as average.

Theoretical spreading rate  19.12 - 13.6 m²/l

Spreading rate depends on film thickness applied, type of texture, surface porosity, imperfections, temperature, wastage during painting etc.

The average spreading rate per coat can be confirmed at site by a trial application. Maximum spread rate per coat is obtained at minimum dry film thickness and vice versa.

Thinner

Water

Dilution

Maximum 10 %

Conditions during application

The temperature of the substrate should be minimum 10 °C and at least 3 °C above the dew point of the air, measured in the vicinity of the substrate. Good ventilation is usually required in confined areas to ensure proper drying.

Drying times

Drying times are generally related to air circulation, temperature, film thickness and number of coats, and will be affected correspondingly.

1. Recommended data given is, for recoating with the same generic type of paint.

2. In case of multi-coat application, drying times will be influenced by the number and sequence and by the total thickness of previous coats applied.

3. The surface should be dry and free from any contamination prior to application of the subsequent coat.

4. The primer will have after tack although it is cured fully.

Directions for use

Surface preparation

The substrate must be sound, clean, dry and free from dust, oil, grease, laitance etc. All traces of form release agents/curing agents must be removed. A light sanding with suitable abrasive material is recommended before application. Any resulting dust/loose particles must be removed.

Recommended paint system

Primer
Jotashield Waterbased Penetrating Primer: 1 Coat

Topcoat
To be topcoated with suitable system.

Remarks
Other systems may be specified, depending on area of use.
Contents of packaging with different batch numbers must be mixed together before use.
Please refer to the Decorative Sales Department for technical advice.
This product is available in: United Arab Emirates, Bahrain, Kuwait, Qatar, Oman, Saudi, Egypt and Libya

Health and safety
Please observe the environmental and precautionary notices displayed on the container.
A Material Safety Data Sheet for the product has been issued.
Detailed information regarding health and safety risks and precautions for the use of this product is specified in the product's Safety Data Sheet.
First-aid measures, refer to section 4.
Handling and storage, refer to section 7.
Transport information, refer to section 14.
Regulatory information, refer to section 15.
