Jotun Essence Easy Primer

Product description

Type
A modified acrylic water-based alkali-resistant primer that is easy to use and improves the performance of exterior and interior topcoats.

Features and benefits
Good adhesion - Ensures good adhesion between concrete surface and topcoat to give lasting paint performance.
Alkali resistant - Resists alkali attack that causes discoloration and improves the performance and appearance of the paint.
Easy to Apply - Effortless application with smooth finish.
Formulated without Harmful Chemicals - Free from harmful chemicals such as APEO, formaldehyde, heavy metals and has low volatile organic compound (VOC).

Recommended use
For interior and exterior application, suitable for new buildings and repainting.

Substrate
On concrete, masonry, plaster, brick work and soft board surfaces.

Product data

Packaging size
Packing may vary from country to country according to local requirements.

Solids by volume
35 ± 2 volume%

Application data

Remarks
Handle with care. Stir well before use.

Application equipment / methods
By brush, roller, airless spray or conventional spray.

Guiding data for airless spray

Nozzle tip
0.021" - 0.027"

Spray angle degrees
65°-80°

Pressure at nozzle
140 - 190 kg/cm² (2100 psi)
Jotun Essence Easy Primer
Technical Data Sheet

Spreading rate per coat

Theoretical 8,8 m²/l - 11,6 m²/l

Spreading rate depends on film thickness applied, type of texture, surface porosity, imperfections, temperature, wastage during painting etc.

Recommended film thickness per coat

<table>
<thead>
<tr>
<th></th>
<th>Wet</th>
<th>Dry</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>85 µm - 114 µm</td>
<td>30 µm - 40 µm</td>
</tr>
</tbody>
</table>

Film thickness will vary and is calculated as average.

Thinner

Water

Dilution

The paint is ready to use after proper stirring. If thinning is required, water may be added up to a maximum of 5%.

Conditions during application

The temperature of the substrate should be minimum 10 °C and at least 3 °C above the dew point of the air, measured in the vicinity of the substrate. Good ventilation is usually required in confined areas to ensure proper drying.

Drying times

Drying times are generally related to air circulation, temperature, film thickness and number of coats, and will be affected correspondingly. The figures given in the table are typical with:

Good ventilation (Outdoor exposure or free circulation of air)

Typical film thickness

One coat on top of inert substrate

The given data must be considered as guidelines only. The actual drying time and time before recoating may be shorter or longer, depending on the ambient temperature, film thickness, ventilation, humidity, underlying paint system, requirement for early handling and mechanical strength etc.

1. Recommended data given is, for recoating with the same generic type of paint.
2. In case of multi-coat application, drying times will be influenced by the number and sequence and by the total thickness of previous coats applied.
3. The surface should be dry and free from any contamination prior to application of the subsequent coat.

The drying time is measured by stated values

Relative Humidity (RH) 50 %

Directions for use

Surface preparation

The substrate must be sound, clean, dry and free from dust, oil, grease, laitance etc. All traces of form release agents/curing agents must be removed. A light sanding with suitable abrasive material is recommended before application. Any resulting dust/loose particles must be removed.

Recommended paint system

Storage

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

Certificates

Complies to Singapore Green Label

Tests

Volume Solids % measured according to ISO 3233:1998 (E).

Health and safety

Please observe the environmental and precautionary notices displayed on the container.

A Material Safety Data Sheet for the product has been issued. Detailed information regarding health and safety risks and precautions for the use of this product is specified in the product’s Safety Data Sheet. First-aid measures, refer to section 4. Handling and storage, refer to section 7. Transport information, refer to section 7. Regulatory information, refer to section 15.
