Jotafloor PU Topcoat

Product description
This is a two component isocyanate cured polyurethane coating. It is a high performance, non yellowing product. It is easy to apply. This product is tintable in a wide range of colours in Jotun's Multicolor Industry (MCI) system. It has excellent gloss and colour retention. It has good chemical, abrasion and impact resistance. If enhanced slip resistance is required Jotafloor Non Slip can be used in the system. To be used as topcoat in atmospheric environments. Suitable on approved primers on concrete substrates.

Typical use
Designed for a wide range of floors with various levels of mechanical and chemical exposure. Specially designed for areas exposed to direct sunlight where gloss and colour stability is desired. Recommended as a topcoat as part of the car parks, parking bays, pedestrian walkways, industrial floors, drive ways, ramps and traffic deck systems.

Approvals and certificates
This product contributes to the Green Buildings Standard credits. Please see section Green Building Standards.

Determination of Elongation - ASTM D2730
Determination of ease of decontamination - BS4247 Part 1:1987

Additional certificates and approvals may be available on request.

Colours
according to colour card and Multicolor Industry tinting system (MCI)

The provided data is typical for factory produced products, subject to slight variation depending on colour.
All data is valid for mixed paint.
Gloss description: According to Jotun Performance Coatings' definition.

Date of issue: 4 February 2019

This Technical Data Sheet supersedes those previously issued.
The Technical Data Sheet (TDS) is recommended to be read in conjunction with the Safety Data Sheet (SDS) and the Application Guide (AG) for this product. For your nearest local Jotun office, please visit our website at www.jotun.com
Film thickness per coat

Typical recommended specification range

<table>
<thead>
<tr>
<th></th>
<th>Dry film thickness</th>
<th>Wet film thickness</th>
<th>Theoretical spreading rate</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>50 - 80 μm</td>
<td>80 - 130 μm</td>
<td>12.6 - 7.9 m²/l</td>
</tr>
</tbody>
</table>

Spreading rate depends on film thickness applied, type of texture, surface porosity, imperfections, temperature, wastage during painting etc. The actual spreading rate per coat may vary depending on the size of the Jotafloor Non Slip Aggregates used. Coverage on Non slip aggregate would reduce considerably.

Surface preparation

To secure lasting adhesion to the subsequent product all surfaces shall be clean, dry and free from any contamination.

Laitance deposits are best removed by Planetary diamond disc grinder or by captive blasting followed by vacuum cleaning to remove dust debris. For old concrete, Jotun technical team should visit the site and appropriate surface preparation methodology should be recommended and that is to be followed. Substrate should be atleast 28 days old and have moisture content not exceeding 5% and leave a clean, sound and stable base. The prefferred method of abrading the substrate is dust free captive blasting or diamond grinding. To fill any blow holes or undulations in the substrate Jotafloor Filler or Jotafloor Filler Plus may be used.

Application

Application methods

The product can be applied by

**Spray:** Use airless spray or conventional spray.

**Brush:** Recommended for stripe coating and small areas. Care must be taken to achieve the specified dry film thickness.

**Roller:** May be used. Care must be taken to achieve the specified dry film thickness.
Conditions during application:

The temperature of the substrate should be minimum 10 °C and at least 3 °C above the dew point of the air, measured in the vicinity of the substrate. Good ventilation is usually required in confined areas to ensure proper drying. The moisture content in the substrate should not exceed 4 % (by weight). The coating should not be exposed to oil, chemicals or mechanical stress until fully cured.

This product should not be applied on to the surfaces which are known to, or likely to suffer from, rising dampness, potential osmosis problems or have a relative humidity greater than 80% as measured in accordance with BS 8203 Appendix A.

Product mixing ratio (by volume)

| Jotafloor PU Topcoat Comp A | 5 part(s) |
| Jotafloor PU Topcoat Comp B | 1 part(s) |

NO PART MIXING.
Use a slow speed drill and mixing paddle.

The temperature of base and curing agent is recommended to be 18 °C or higher when the product is mixed.

Part mixing of these components is not acceptable and will affect both performance and appearance of the finished floor.

Mixing should be carried out using a heavy duty, slow-speed drill with appropriate mixing paddle attachment. The individual components should be thoroughly stirred to disperse any settlement, then the Comp A and Comp B packs should be mixed together. The entire contents of the hardener (B) container should be added to the base (A) and mixed together for two minutes until a homogeneous mix is obtained. When a homogenous state has been achieved split the mixed paint in to two separate containers and continue mixing both portions of the mix for a further 2 minutes.

Thinner/Cleaning solvent

Cleaning solvent : Jotun Thinner No. 10

No dilution is required.

Guiding data for airless spray

Nozzle tip (inch/1000): 13 - 17
Pressure at nozzle (minimum): 150 bar/2100 psi

Drying and Curing time

<table>

Surface (touch) dry: The state of drying when slight pressure with a finger does not leave an imprint or reveal tackiness.
Technical Data Sheet
Jotafloor PU Topcoat

Walk-on-dry: Minimum time before the coating can tolerate normal foot traffic without permanent marks, imprints or other physical damage.

Dry to over coat, minimum: The recommended shortest time before the next coat can be applied.

Dry to over coat, maximum, atmospheric: The longest time allowed before the next coat can be applied.

Dried/cured for service: Minimum time before the coating can be permanently exposed to the intended environment/medium.

Induction time and Pot life

Product compatibility

Depending on the actual exposure of the coating system, various primers and topcoats can be used in combination with this product. Some examples are shown below. Contact Jotun for specific system recommendation.

Previous coat: Jotafloor Sealer or Jotafloor SF PR 150 or Jotafloor Solvent Free Primer

Packaging (typical)

<table>
<thead>
<tr>
<th></th>
<th>Volume (litres)</th>
<th>Size of containers (litres)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jotafloor PU Topcoat Comp A</td>
<td>3.75/15</td>
<td>5/20</td>
</tr>
<tr>
<td>Jotafloor PU Topcoat Comp B</td>
<td>0.75/3</td>
<td>1/5</td>
</tr>
</tbody>
</table>

The volume stated is for factory made colours. Note that local variants in pack size and filled volumes can vary due to local regulations.

Storage

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

Shelf life at 23 °C

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Jotafloor PU Topcoat Comp A</td>
<td>24 month(s)</td>
</tr>
<tr>
<td>Jotafloor PU Topcoat Comp B</td>
<td>24 month(s)</td>
</tr>
</tbody>
</table>

In some markets commercial shelf life can be dictated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection.

Green Building Standards

This product contributes to Green Building Standard credits by meeting the following specific requirements:

LEED®v4 (2013)
MR credit: Building product disclosure and optimization
- Material Ingredients, Option 2: Material Ingredient Optimization, International Alternative Compliance Path - REACH optimization: Fully inventoried chemical ingredients to 100 ppm and not containing substances on the REACH Authorization list – Annex XIV, the Restriction list – Annex XVII and the SVHC candidate list.
- Environmental Product Declarations. Product-specific Type III EPD (ISO 14025;21930, EN 15804).

SS Credit: Heat Island Reduction
Selected colour(s) of this product meets the requirements of:
SRI of at least 39 for steep-sloped roof
SRI of at least 39 for parking roof covering

BREEAM® International (2016)
- Mat 01: Product-specific Type III EPD (ISO 14025;21930, EN 15804).

BREEAM® International (2013)

Additional certificates and approvals may be available on request.

Caution

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Jotun's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Jotun representative for approval before commencing the work.

Health and safety

Please observe the precautionary notices displayed on the container. Use under well ventilated conditions. Do not inhale spray mist. Avoid skin contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water. Eyes should be well flushed with water and medical attention sought immediately.

Colour variation

When applicable, products primarily meant for use as primers or antifoulings may have slight colour variations from batch to batch. Such products may fade and chalk when exposed to sunlight and weathering.
