

LITTLE EXPRESSIONIST

JOTUN KIDS COLLECTION

The Little Expressionist is a collection of colours curated by Jotun and inspired by the vivid thoughts of kids. Each theme is a tribute to the lush landscapes we live in, and every colour is designed to fill your child with wonder and make a difference to their world. We believe that the best way to best way to preserve a world of colour is to nurture them with bits of creativity.

What if on a whim, our kids could walk on rainbows? They could make a wish and frolic with ivory tusked elephants & orange-bellied orangutans.

They could cherish the rich colours of nature as they explore & wander through, deep red woods. A child's imagination is wild and vivid, just as it should be.

Wouldn't it be wonderful if our children could
enjoy the magic of the ocean everyday?
Their world would be a very different place.

They would go to bed dreaming of the shiest
of species. Or dive into the shimmering green
depths to marvel at beautiful corals. And
maybe these dreams of greens, yellows and
blues would someday become a reality in
their very own rooms.

The colours of nature can be a canvas for a child's mind. A vast, uncluttered land that's sprinkled with different hues of pretty pinks, deep reds and beautiful beiges. It can be an oasis of imagination brimming with life. A special place where purple sunsets cast their glow. The only thing nature doesn't deserve to be, is a mirage of something magical that our future generations will never see nor enjoy.
